Art Unit: 1743

1. Claims 5-6 are objected to because of the following informalities: In claim 5, last line "connector" should be "connection means" for proper antecedence. In claim 6, line 1, "4" should be "5". Appropriate correction is required.
2. Claim 5 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
3. Claim 5 precludes the biasing spring, and there is no description of an embodiment lacking the biasing spring.
4. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites that the dispensing means is a tube and piston plunger whereas claim 6 recites that the dispensing means is a spring; thus claim 6 contradicts claim 5.

5. Applicant's arguments filed April 24, 2007 have been fully considered but they are not persuasive.
6. The amendment to claims 5-6 necessitated new grounds of rejection. Arguments with respect to claims 1-2 are persuasive.
7. Claims 1-2 are allowed.
8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 1743

In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
